GRACE GRAVITY'S NEW ANALOG RECORD

Dream Analog

VINYL, CD, AND DIGITAL RELEASE DATE: April 18, 2020

FOR IMMEDIATE RELEASE: March 5, 2020

A True Analog Recording on 180g Vinyl. Grace Gravity is set to release something very rare these days... an all analog record.

Dream Analog was recorded, mixed and mastered analog (to tape). You can hear and feel the difference.

Producer and Engineer, Brian D. Hardin, **(India Irie, Indigo Girls, Ziggy Marley, Steve Winwood, Donna Summers, Willie Nelson, Amy Grant, Whitney Houston)** recorded the album on a Tascam 16-track machine and mixed on an SSL to quarter inch tape. The band played the songs live in a small home studio and singer/songwriter, Teri Hitt, sang all the lead vocals live in a nearby room. Because they recorded live together it makes for an authentic, warm recording that is a pleasure to listen to.

Mastered for vinyl by legend Bernie Grundman (Carole King, Steely Dan, Michael Jackson, Prince, Joe Cocker, Joni Mitchell, Jackson Brown, Linda Ronstadt, Fleetwood Mac).

There is a full pallet of sonic colors to explore in *Dream Analog.* It begins with *It's Coming On,* an introspective song about the awakening that happens when you discover you are more than who you thought you are. There are some beautiful horns in the mellowness of *Song of The Satellite* and *The Long Road* in contrast to the driven rock vibe of *Keep It Together*. Recorded at A=432hz instead of the standard A=440hz. **Do you Dream Analog?**

"Teri's vocals open a portal to another realm."

"When she sings angels fly out of her mouth."
